Audio and Video requests

Batlife Europe has received the 2 requests below, from individuals looking for donated audio or video recordings for use in projects. If anyone would like to offer the use of their recordings, or would like more information, please let us know and we will put you in touch with them.

1. A representative of a multimedia production company is looking for a 30-second silent video clip of a common pipistrelle in a pink sandstone cliff habitat. This for the new Pavillon de la Biodiversité space at the Musée de la Cour d'Or, in Metz (France), which opens in August 2025.
2. An artist working with moving images, scenography, and sound, based between Stockholm and Amsterdam, has asked if anyone has bat sonar recordings that could be shared for artistic purposes. They are currently working on a project featuring a fictive species, which merges elements of whales and bats, as they are curious about sounds and forms of communication that are inaudible or beyond human perception, and how these can be translated and made audible to human ears. As part of this project, they are creating a soundscape blending whale and bat sonar.
